Fund manager's commentary

Fixed income assets generated positive returns in a tightening monetary policy environment. Due to rising interest rates government bond yields rose, especially in short term debt, which suppressed price appreciation. Despite weak macroeconomic data corporate balances remained stronger than expected. This resulted in high yield fixed income outperformance relative to investment grade corporates. Bond volatility started trending down, as measured by the MOVE index, after levels not seen since the global financial crisis in the first quarter.

The shares and weightings of the fund's benchmark index are selected in accordance with the investment strategy set out in the rules of the fund, but the fund manager may make investment decisions at his own discretion. The value of the investment may fluctuate up and down. You may earn less than you have invested. Past performance is no guarantee of future results.
