

Information about pension fund

Management company:	"Luminor investicijų valdymas" UAB
Fund manager:	Vytenis Lapinskas
Custodian bank:	Luminor Bank AS
Date of inception:	2019.01.02

Fund description

It is a stable and reliable way to save for retirement, the main purpose is to protect your accumulated funds against inflation with limited investment risk. The fund is mostly relevant for people who have reached retirement age or are about to start receiving a retirement benefit. The funds are mainly invested in investment-grade debt securities of the European Union, governments of Organisation for Economic Co-operation and Development (OECD) countries, developing countries and non-investment-grade corporates, as well as deposits.

** Aggregated on a 365 days per year basis.

Fund manager's commentary

The first quarter of the year was negative for developed market bond indices while positive for riskier non-investment grade fixed income and emerging market debt. Market participants reduced their interest rate expectations which are now in line to what major central banks communicate. This dynamic resulted in an increase of expected rates and increase of bond yields which pushed down prices. Euro zone investment grade sovereign and corporate bond index decreased by 0,4%, emerging market debt index rose by 0,9%, while European high yield index increased by 1,8%.

The shares and weightings of the fund's benchmark index are selected in accordance with the investment strategy set out in the rules of the fund, but the fund manager may make investment decisions at his own discretion. The value of the investment may fluctuate up and down. You may earn less than you have invested. Past performance is no guarantee of future results.
