

Information about pension fund

Management company:	"Luminor investicijų valdymas" UAB
Fund manager:	Vytenis Lapinskas
Custodian bank:	Luminor Bank AS
Date of inception:	2007.10.01
Report prepared by	Rita Aglinskienė

Fund description

It is a high-risk fund where up to 100% of its assets can be invested in equity markets. It has a global exposure to equities, with a more stable long-term return compared to sector or regional funds. Designed for participants seeking potentially higher returns over the long term and exposed to large fluctuations in value. Recommended for 16-50 year olds.

1. Average pension fund return **
2. Average return of the benchmark **
3. Standard deviation of change in unit value ***

* Past performance provides no guarantee of future performance.
** The average change in the unit value and in the value of the benchmark over the last three, five, ten years is calculated as the geometric average of the annual changes in the unit value and changes in the value of the benchmark.
*** Standard deviation is a statistical risk indicator that shows how strongly changes in the value of a unit fluctuate compared to their average change. The standard deviation of the change in the unit value over the last three, five, ten years and since inception is the annual standard deviation of the change in the unit value for the specified period.

Fund manager's commentary: The last quarter of 2024 brought positive returns to all pension funds without exception. In November, with the election of Trump as U.S. president—who promised to boost business and raise import tariffs—expectations of future inflation increased, as a result, interest rates rose, while risky assets became more expensive. Over the quarter, the overall index of developed-country equities, expressed in euros, rose by 7.6%, but regional performance varied: U.S. stocks in euros increased by more than 10%, while European stocks fell by 2.7%. Shares in emerging markets were down by 0.9%. Due to the favourable quarter and the whole year for the stock markets, Luminor's future 16-50 pension fund's return in the fourth quarter was 6.8% and contributed to an excellent result for the year. Over 2024, the pension fund's return reached as much as 23.0 per cent.

The shares and weightings of the fund's benchmark index are selected in accordance with the investment strategy set out in the rules of the fund, but the fund manager may make investment decisions at his own discretion. The value of the investment may fluctuate up and down. You may earn less than you have invested. Past performance is no guarantee of future results. Pursuant to our contract with MSCI Inc., we have a contractual obligation to provide the following information: Luminor Investment Management, UAB calculates the return of the composite benchmark using the end-of-day benchmark values obtained from MSCI (MSCI data). For the avoidance of doubt, MSCI is not a standard composite benchmark administrator or contributor, aggregator or supervised provider and MSCI data are not deemed a submission or a provision for the purposes of composite benchmark returns, as those terms may be defined in any rules, laws, regulations, legislation or international standards.
